6302760453

Java Backend Developer with 3.6+ years of hands-on experience building enterprise-grade systems in highly regulated industries including Banking, Healthcare, and FinTech. Proficient in Java, Spring Boot, Microservices architecture, and RESTful API development, with a sharp focus on security, reliability, and scalability. Brings a proven ability to translate complex business requirements into production-ready solutions while consistently delivering in fast-paced Agile teams.

EXPERIENCE

Integra Micro Software Services · Software Engineer

Dec 2024 – Present

- Built production-grade middleware APIs using Java, Spring Boot, Apache Camel and Microservices, incorporating encryption/decryption & signing/verification with symmetric and asymmetric key management for secure exchange.
- Led migration of services from VM to OCP, addressing audit compliance and improving overall code quality by 40% through SonarLint integration. Developed a centralized logging module across all microservices, implementing structured logging with standardized log levels integrated with Elasticsearch for real-time production monitoring.
- Developed high-performance, secure banking APIs including CARD, UPI, IMPS, and NetBanking using Java, Spring Boot, and Microservices, reducing API response time by 40%, implementing robust threat protection and integrating government services like Aadhaar, Biometric, and eKYC with comprehensive end-to-end technical documentation.

Virtusa Consultant Services · Associate Engineer

June 2022 – Aug 2024

- Developed and deployed scalable, high-performance, fault-tolerant backend services using Java, Spring Boot, and Microservices reducing latency by 30% and following Agile methodology in a fast-paced collaborative environment.
- Built RESTful APIs for a healthcare core application supporting real-time health monitoring and automated user alerts, while identifying and resolving version vulnerabilities to eliminate application crashes and improve stability.

PROFESSIONAL PROJECTS

TNGB · Tamil Nadu Grama Bank

- Designed secure, high-performance middleware APIs integrating Bank, Frontend, Core Banking, and government services like Protean, NSDL, and ScoreMe using Java, Spring Boot, Microservices, RabbitMQ, Redis, and MySQL, reducing response time by 40%, implementing robust security measures and effectively mitigating risk attacks.
- Developed APIs with comprehensive XML and JSON validation for efficient request processing, implementing structured exception and error handling with proper logging to prevent memory leaks and ensure application stability.
- Designed and implemented distributed microservices architecture integrated through API Gateway, enabling secure, scalable, resilient, fault-tolerant, and high-availability communication between multiple backend systems.

TATA Capital · FinTech Application

- Implemented APIs with optimized database operations for high-speed processing, and implemented HTTP, RestTemplate, Netty, WebClient, and message brokers for efficient inter-service communication across microservices.
- Collaborated with DevOps and cross-functional teams to streamline CI/CD pipelines ensuring faster, reliable delivery, and implemented end-to-end cURL request sanitization to enhance API security and prevent injection attacks.

Micromedex · Healthcare Application

- Built secure authentication and authorization layers using OAuth2, implementing role-based access control (RBAC) to protect sensitive patient information and ensure strict compliance with healthcare security standards and regulations.
- Optimized backend API performance by resolving bottlenecks and reducing response times, while conducting code reviews and following clean code principles to ensure high code quality and maintainability.

SKILLS

Languages: Java

Frameworks: Spring Boot, Spring Cloud, Hibernate, Apache Camel, Quarkus

Architecture: Microservices, API Gateway, RESTful APIs, Design Patterns, Multithreading, Event-Driven Architecture

Databases & Messaging: SQL, Redis, RabbitMQ, Apache Kafka, MySQL

Tools: CI/CD Pipelines, Docker, GitLab, Postman, SonarLint, JIRA, Swagger

Soft Skills: Problem Solving, Troubleshooting, Technical Documentation, Communication, AI-Powered Productivity

EDUCATION

Bachelor Of Technology · Anantha Lakshmi Institute of Technology and Sciences, JNTU Anantapur · 2022

CERTIFICATIONS

Oracle Certified Associate · Java SE 8 Programmer (1Z0-808) · 2022 · [Link](#)
